This International Searching Authority found multiple inventions in this international application, as follows :

Group A: Claims 1, 2, 5 and 6 are directed to an electrical connector comprising housings. Further description of the housings and of the way they cooperate with each other is defined.

Group B: Claims 3 and 4 are directed to an electrical connector comprising first and second members. Further description of the first and second members is defined

The common subject matter of Group A and Group B is well known and the remaining subject matter of each group differ from the other without there being any unifying novel inventive concept, involving one or more of the same or corresponding special technical features, common to both Groups.
